<b>Requestor Category:</b> 4CB		<b>Status:</b> Allocated to a release

**Description of requested change:**

Editorial changes regarding on UDFS and UHB (for R2025.JUN)

**Reason for change and expected benefits/business motivation:**

The editorial changes relate to either the UDFS or UHB for R2025.JUN. Their incorporation into the UDFS or UHB for R2024.NOV is required for clarifying the documentation underlying the software.

Please note that the changes referring to UDFS for R2025.JUN will also be reflected, when relevant, into the message documentation published in MyStandards.

**2 EUROSYSTEM UPDATE [INC-422446]: page 438 (GFS-chapter 3.5.6.2 Description of the module), page 440 (GFS chapter 3.5.6.3 Description of the functions of the module), page 396 (UDFS chapter 1.6.1.8.4. Provision check process), page 671 (UDFS chapter\_1.6.2.4.3 Corporate actions / monetary policy operations cash process); CR-679 SLTO not executed**

The standing liquidity transfer order set up for the DCA “DCA-TEST-CR679” with a triggering event CARL and a dedicated amount configuration in T2S is not executed after a CORP-labelled PFOD SI moving cash to the account. The amount transferred is lower than the threshold for this SLTO, but it should have attempted an immediate liquidity transfer which would have been rejected with the proper BR (SXAA020). It seems to happen because the PFOD occurs the first day of the SLTO active period as it has been working in the same configuration apart from this parameter.

GFS-chapter 3.5.6.2 Description of the module, page 438

3.5.6.2 Description of the module

### ***Management of the Rebalancing Liquidity following Corporate Action or Monetary Policy Operation***

A collection can contain one or several Settlement Transactions related to corporate actions **{T2S.06.111}** **{T2S.06.112}** or central bank monetary policy operations (in repo countries) **{T2S.06.630}**. They are identified by their ISO transaction code.

In case of monetary policy operations, the rebalancing of the credited cash to the RTGS is mandatory.

In case of corporate action, the rebalancing of the credited cash to the RTGS is performed if the credited party has subscribed to the Corporate Action Rebalancing Liquidity (CARL) and if the amount to be credited is equal to or above the minimum threshold configured on the standing order for rebalancing.

In both cases, the module generates an additional Settlement Transaction in order to automatically transfer the received cash into the relevant RTGS Dedicated transit account **{T2S.06.117}**. This Settlement Trans-action is

added to the collection to be settled together with the Settlement Transactions related to corporate actions **{T2S.06.118}** or monetary policy operations **{T2S.06.630}**.

GFS-chapter 3.5.6.3 Description of the functions of the module, page 440

3.5.6.3 Description of the functions of the module

## 2 – Common Limit and Provision Checking

[...]

*Preparation of Corporate Action and Monetary Policy Rebalancing Liquidity transfers*

[...]

When receiving the collection and before performing any other treatment, the function prepares the Settlement Transactions corresponding to immediate Liquidity Transfers related to corporate action or monetary policy settlement transactions. These prepared Settlement Transactions are to be taken into account by the provisioning net flow preparation.

More specifically, the function:

- | Selects the Settlement Transactions which have an ISO transaction code related to a corporate action or monetary policy operation;
- | For each Settlement Transaction related to a corporate action, checks in the static data if an option of automatic transfer to RTGS account is defined for the credited T2S Dedicated cash account and if the amount to settle on the settlement transaction is equal to or above the optional minimum threshold configured for the rebalancing standing order;
- | In case of a Settlement Transaction related to monetary policy operation, or in case of a corporate action with the rebalancing option, prepares the associated immediate Liquidity Transfer settlement transaction, moving the received cash into the RTGS Dedicated transit account corresponding to the currency. No immediate Liquidity Transfer for rebalancing is generated in case of a corporate action with the rebalancing option if the amount to be settled move is below the optional minimum threshold.

UDFS-chapter 1.6.1.8.4 Provision check process, page 396-397

1.6.1.8.4. Provision check process

*Provision check preparation*

Generation of Liquidity Transfer for cash rebalancing

T2S rebalances automatically to the RTGS, the cash credited by Settlement Instruction related to corporate actions or related to monetary policy operations according to the conditions below.

On Settlement Instruction related to a corporate action (See section Proceeds resulting from Corporate Actions or monetary policy operations [□ 581]), T2S generates immediate Liquidity Transfer if all the following rules are

fulfilled:

Addition to previously specified table according to below:

Conditions	Rules
Settlement Instruction related to a corporate action	The ISO transaction code of the Settlement Instructions is related to corporate action on stock or on flow.
Existence of a predefined standing order for rebalancing	A valid predefined standing order is set by the owner of the T2S dedicated cash account to rebalance cash received from a corporate action.
<u>Existence of a minimum threshold for a predefined standing order for rebalancing</u>	<u>The amount of the liquidity transfer is equal to or above the minimum threshold.</u>

If the amount to be settled on the Settlement Instruction related to the corporate action is below the optional minimum threshold configured on the standing order for rebalancing, T2S does not generate any unsettled immediate Liquidity Transfer.

UDFS-chapter 1.6.2.4.3 Corporate actions / monetary policy operations cash process, page 671

#### Creation of Liquidity Transfer

The existence of Corporate Actions is checked in T2S at any time of the Settlement Day, during Night-time or Real-time Settlement periods. For details in respect of this checking process, please refer to section Provision check process [□ 306].

For any Settlement Instruction related to Corporate Actions (leading to a credit posting on the Dedicated Cash Account), T2S checks whether a Standing Liquidity Transfer Order related to Corporate Action was defined for the T2S Dedicated Cash Account to be credited. If such an Order exists and if the amount to be credited is equal to or above the optional minimum threshold configured on the standing order for rebalancing, T2S automatically generates a Liquidity Transfer which immediately and always transfers the respective cash proceeds from the T2S Dedicated Cash Account to the linked RTGS account (in a way avoiding that the cash may be used for any other purpose in the meantime). Within T2S this automatic Liquidity Transfer generation is triggered by the business event "CARL".

**3 EUROSYSYSTEM UPDATE [INC-415701]: page 276 (UDFS-chapter 1.6.1.5.3 Cancellation process); UTEST - Discrepancy in cancellation response message statuses (CANI/ CANT)**

Based on ticket analysis, instructions should have received CANI instead of CANT from T2S.

D0534081 -->Instruction was cancelled by user, participant should have received CANI but T2S has sent CANT which is not expected.

D0534079 / 2405162847361932 -->Instruction was cancelled by user, participant should have received CANI but T2S has sent CANT which is not expected.

UDFS-chapter 1.6.1.5.3 Cancellation process, page 276

Instruction Cancellation process

(...)

If the referenced Settlement Instruction is matched, T2S requires bilateral cancellation and the cancellation is only possible if both Counterparties send their Cancellation Instructions to cancel each leg separately or if the Cancellation Instruction is sent with the information of both legs by an authorised T2S Party \*.

[footnote \*]

In case the CSD and the Party send their respective cancellation instructions for the same leg, and both remain pending in the system awaiting for their counterparty in order to match and be executed, T2S matching process prioritises for the matching the CSD cancellation instruction over the party cancellation instruction.

DWH UHB-chapter 6.2.1 SST01 – Finalised matched instructions, page 416

**Context of Usage**

This report shows volumes, ~~values~~ amounts and quantities for all finalised settlement instructions (SIs), at CSD or CSD participant or securities account level, during a selected period of time. The settlement instructions are filtered according the settlement types of the securities and the currency of the settlements that the user selects.

The report delivers the volume of matched settlement instructions finalised during the selected period whether settled, partially settled or cancelled, the total of original instructed quantity whether settled, partially settled or cancelled, the settled quantity, the matched value amount and the settled ~~value-~~amount per ISIN.

The results are displayed aggregated per transaction type code, transaction sub-category and securities movement type.

Editorial updates
-------------------

DWH UHB-chapter 6.2.2 SST02 – Detailed finalised matched instructions, page 419

**Context of Usage**

This report shows detailed information on volume and quantities for all finalised settlement instructions (SIs), at CSD or CSD participant or securities account level, during a selected period of time. The settlement instructions are filtered according the settlement types of the securities that the user selects.

The volume, the instructed quantities and the settled quantities of settlement instructions are displayed per ISIN per settlement status.

The results are displayed aggregated per transaction type code, transaction sub-category and securities movement type and as totals.

This report can be used by CSD users.

Editorial updates
-------------------

DWH UHB-chapter 6.3.1 INX01 – Individual settlement detailed report, page 435

**Context of Usage**

This report shows all finalised business settlement instructions (SI) corresponding to the selected T2S references.

The attributes shown in the output provide business details related to each of the selected settlement instructions and are represented by a button to select the Delivery or Receiver tab for the corresponding perspective. This simplifies the comparison between the instructions, displayed in a manner which allows easy comparison between these instructions.

**Figure 5 - INX04 prompt screen 2 (CSD User login) - Party BIC**

New figure:

The screenshot shows a web browser window with the title "INX04 – Multi-criteria search of a set of settlement restrictions – Prompt". The browser's address bar shows "HTML". The page content includes a search interface with a "Keywords:" section containing an input field "Input keywords here" and a search icon. Below the input field is a "Select all" checkbox and the text "No Results". To the right of the search box is a large empty area with the text "Please search and select the securities account number" and "Select all Deselect all" at the bottom. Below the search box is a dropdown menu "Starts with any of these keywords" and a checked checkbox "Case Insensitive". There are three boxes for settlement status: "PSET - Partially settled", "SETT - Settled", and "USET - Unsettled". There are two boxes for cancellation status: "CANC - Cancelled" and "NCAN - Not cancelled". The "Range criteria" section includes "Entry date:" and "Intended settlement date:" with "From" and "To" date pickers, all set to "Nov 15, 2024". At the bottom of the page are four buttons: "Cancel", "< Back", "Next >", and "Finish".

**Figure xxx - INX04 prompt screen 2 (CSD User login) - Account number**

Update of figure 398:

The screenshot shows a web application interface for searching settlement restrictions. At the top, there is a browser toolbar with 'Edit', navigation arrows, and 'HTML'. The main title is 'INX04 – Multi-criteria search of a set of settlement restrictions – Prompt'. Below the title, there are several sections:

- Cash party BIC:** A search box labeled 'Keywords:' with the placeholder 'Input keywords here' and a search icon. Below it is a 'Select all' checkbox and the text 'No Results'. To the right is a large empty box with the instruction 'Please search and select the cash party BIC' and 'Select all Deselect all' at the bottom.
- Settlement status:** A dropdown menu showing 'Starts with any of these keywords'. Below it is a checked checkbox for 'Case Insensitive' and a list of status options: 'PSET - Partially settled', 'SETT - Settled', and 'USET - Unsettled'.
- Cancellation status:** A list of options: 'CANC - Cancelled' and 'NCAN - Not cancelled'.
- Range criteria:** Two columns labeled 'From' and 'To'. Each column has two date pickers: 'Entry date' and 'Intended settlement date', both set to 'Nov 15, 2024'.

At the bottom of the screen, there is a navigation bar with four buttons: 'Cancel', '< Back', 'Next >', and 'Finish'.

**21 EUROSYSTEM UPDATE [Internal review]: page 558 ff. (DWH UHB-chapter 6.7.1 RAL01 –Detailed realignment and other technical instructions); Editorial update**

Editorial updates
-------------------

DWH UHB-chapter 6.7.1 RAL01 –Detailed realignment and other technical instructions, page 558

**Context of Usage**

This report shows detailed information on volume and quantities for all realignment and other technical settlement instructions (SIs) at CSD, CSDP/ECSD or securities account level, during a selected period of time. The settlement instructions are filtered according to the settlement types of the securities that the user selects.

The volumes and quantities (original and the settled) are aggregated per ISIN per transaction type code, transaction category and transaction sub-category; and displayed by securities movement type and settlement status.

[...]

**Field Description**

RAL01 – Detailed realignment and other technical instructions – Prompt screen	
Date From	You can select the date by clicking on the calendar. This field is mandatory.
[...]	[...]
Securities account number	You can use this drop-down field to select one or several securities account numbers. This field will show all related securities accounts which belong to default data scope of the user's party and which belong to the parties selected in field "Party BIC". If no Party BICs are selected, this field shows all securities account numbers belonging to the default data scope of the user's party. This field is optional.
Securities-ISIN	The report output contains only settlement instructions with the selected securities. This field is optional.

[...]
